Type SB4 load cell

- **High Accuracy**
- **Stainless Steel Construction**
- **Resistant to off axis loads**
- **Allows vessel expansion**

Description

Flintec loadcells are designed to meet the most stringent accuracy requirements. Certifications have been obtained from Weights & Measures Authorities ,worldwide.

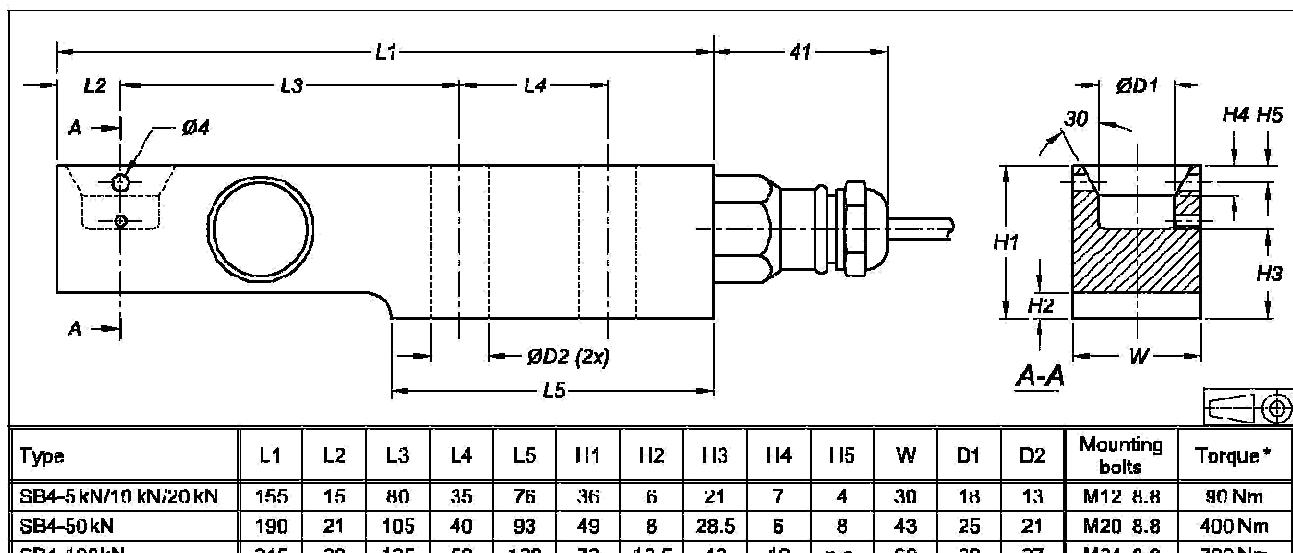

SB4 loadcells are available in the capacities 5 kN to 100 kN (510kg to 10197kg) and include Accuracy Classifications GP, C1, C3, C3 MI 7.5, C4 and C4 MI 7.5 according to OIML R 60; NTEP n max=5000.

They offer total stainless steel construction and complete hermetic sealing, making them suitable for use in the toughest industrial environments.

The unique "blind" loading hole combined with the available Flintec loading hardware provides an excellent price-performance ratio.

It allows very low profile platform design and offers advantages in all kinds of weighing applications. The Flintec calibration technique (inmV/V/) eliminates time consuming corner calibration in multiple load cell systems. The SB4 is available for use in hazardous areas zone 1, 2 (gas) and 21, 22 (dust) according to EExia IIC T6...T4 T130°CATEX.

Sealing		complete hermetic sealing; cable entry sealed by glass to metal header				
Protection according DIN 40.050					IP 68	

* Available with E_{max}/20000 for 3-range scales.

Wiring

- The load cell is provided with a shielded, 4 conductor cable.
- Cable length: 3 m
- Cable diameter: 5 mm
- The shield is connected to the load cell body.

Note:

Maximum errors (+/-) are expressed as a percentage of rated load (when measured at 10Vdc excitation). The linearity and hysteresis is the maximum deviation from a straight line drawn between the no load and the rated load outputs for both increasing and decreasing loads. Accuracy classes apply when active range (live weight) is within 20 to 90% of rated load.
